

## #keepup partner meeting in Bratislava

The second physical project partner meeting took place on the 20th of September in Bratislava, Slovakia. The host organization was the Italian-Slovak Chamber of Commerce. Four out of six partners were able to join us live in Slovakia, the rest participated online.

The programme of the meeting was very tight and aimed first of all at evaluation, testing and validation of intellectual outputs (IO) and project progress as well as planning for the period until the project end date. The meeting was a fruitful event which helped determine the best actions which ensure the project keeps going in the right direction.
